

Hemparade®

The comfortable, durable stable bedding

HempFlax bv

produktie en verwerking van vezels uit hennep en vlas
production and processing of fibers from hemp and flax

Nature wins!

Hemparade stable litter is the right choice, as it provides your horse or pony with a comfortable stable.

Environmentally friendly

Hemparade is made from the woody core of environmentally grown fibre hemp.

No insecticides or pesticides are used in the cultivation of fibre hemp. HempFlax' modern harvesting and production methods ensure stable litter of a consistently high quality.

Better absorption

The natural absorption capacity of hemp wood is considerably higher than that of conventional materials. Moisture, odours and ammonia are absorbed better and more rapidly.

Hemparade is ideal for horses' hooves, as it forms a springy, insulating bedding. Hemparade's structure prevents it from clogging the animal's hooves. Acidification of stable litters such as wood shavings regularly leads to hoof damage. Farriers rarely come across incidents of hoof rot or other problems where hemp litter is used. Vets recommend the use of Hemparade.

Dust-free and moisture regulating

Unlike wood shavings and straw, Hemparade is virtually dust-free and has a moisture-regulating effect. Veterinary surgeons advise using hemp litter in the stable for horses with an allergy or respiratory problem. Hemparade is equally ideal for those caring for horses who suffer from similar complaints.

Labour saving

Hemparade generates labour savings as the bedding can remain longer in the stable. Consumption is therefore also considerably lower than with straw or wood shavings. Added advantages include less storage space, labour savings and a smaller quantity of stable waste. In the space of just two to three months, Hemparade transforms your dung heap into valuable, organic garden compost.

Hemparade is suitable for all hooved animals and for use in organic chicken and rabbit breeding.

Hemparade comes in bales of approx. 14 kg.

Instructions for use:

1.
Litter down a clean stable with one bale of Hemparade per one and a half to two square metres.

2.
Remove damp patches and manure daily with a fine-tined fork.

3.
Maintain the thickness of the bedding by replenishing with additional Hemparade. The average amount for replenishing is approximately one bale per horse per week. This depends on the level of maintenance and the horse's habits.

BioSpray®

BioSpray prevents the litter being nibbled, has a bacteria-inhibiting effect and masks unpleasant odours. With its vegetable composition, BioSpray is bio-degradable and safe for humans, horses and the environment.

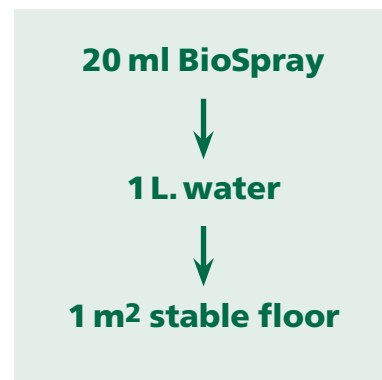

Directions for use:

1.
Mix BioSpray with water
(proportion 1 to 50 is approx.
20 ml per litre of water).

2.
Use 1 litre of this solution
per m² stable floor.

3.
HempFlax BioSpray can also
be used as a stable cleaner
(proportion 1 to 5).
