HempFlax bv

produktie en verwerking van vezels uit hennep en vlas
production and processing of fibers from hemp and flax

Nature wins!

A great product based on pure natural hemp oil. Hoof Oil has beneficial effects on the hooves and horn of all hoofed animals.

A wide range of natural oils has been added to Hoof Oil in order to protect, disinfect and nourish the hooves in a sensible manner.

Hoof Oil is quickly soaked up and does not leave an absorbent film. Hoof Oil seals up the treated surface naturally, preventing dirt from sticking. Because of its unique composition Hemp Oil contributes to healthy horn growth.

Regular use of Hoof Oil will help hooves and horn retain their natural resilience and moisture level, which prevents crumbling, split hooves and cracks and loosening shoes. For treatment of the sole and the cavity of the hooves Hoof Oil is an effective bacteria inhibitor and disinfectant.

Hoof Oil is a preventive care and maintenance product and easy to use. It comes in a 1 litre metal screw cap can with a convenient brush.

Directions:

Hoof Oil is a safe and natural product that is easy to use. No special precautions are required.

1.
Clean the hoof with a brush before applying Hoof Oil. Make sure all dirt has been eliminated and that the hoof is dry.

2.
Apply Hoof Oil with the brush. The oil will be absorbed immediately.

3.
Hoof Oil is made from purely natural components. Its main ingredient is hemp oil (approx. 94%). Hoof Oil also contains disinfectant eucalypt oil, medicinal laurel oil and nourishing wheat germ oil. Natural oils have been added as an anti-oxidant. These oils contain lecithin, arachis hypogaea, ascorbyl palmitate and tocopherol.
