

MiniHemp®

HEMPFLAX MINIHEMP is excellent, 100% natural bedding for small pet enclosures. It is completely composed of the wood core of sustainably cultivated fibre hemp and totally free of chemical additives.

HEMPFLAX MINIHEMP is used as bedding in enclosures for rabbits, guinea pigs, birds and other small animals. An extremely healthy, sustainable and comfortable bedding.

Features

Dust-free

Hemp bedding is virtually dust-free, unlike many other beddings. That is great for animals and their caretakers, especially in case of respiratory issues or allergies.

Nesting behaviour

Hemp bedding is strongly insulating and comfortable nesting material that stimulates natural nesting behaviour and creates woolly burrows to crawl into. For happy pets!

Absorption

Fibre hemp has a much larger natural absorption capacity compared to conventional cage and floor bedding, enabling a significantly better absorption of moisture and unpleasant odours.

User friendly

As dirty and saturated parts can easily be scooped up, MiniHemp outlasts other beddings, making it easier and cheaper.

Information

Product information	Hemp bedding made from the wood core of industrial fibre hemp. Has a 500 to 650% absorption capacity
Product code	7000100: 140 ltr volume 7000310: 100 ltr volume 7000300: 48 ltr volume 7000400: 12 ltr volume
Packaging unit	Bales of 12, 48, 100 or 140 liters, PE plastic
Number of bales per europallet	7000100: 33 bales, 7000310: 24 bales 7000300: 64 bales, 16 bundles 7000400: 224 bales, 28 bundles
Product dimensions	7000100: 40 x 80 x 20 cm 7000310: 20 x 40 x 60 cm 7000300: 15 x 30 x 40 cm 7000400: 10 x 15 x 40 cm

Usage

Combine the bedding with the MiniHemp Soft Mattresses for a complete, hygienic and comfortable animal enclosure.

MiniHemp®

Fibre Hemp...

- doesn't require chemicals during cultivation;
- uses very little water per kilo of fibres for further processing;
- has strong insulating and moisture regulating properties;
- contains no protein content and therefore won't attract pests like insects or rodents;
- stores CO₂ during growth, delivering a positive effect on the CO₂-balance;
- contributes to and represents the circular economy philosophy.

SOLUTIONS FROM NATURE

Industrial hemp fibre is an annually renewable, natural source of non-toxic, high-quality raw materials. Hemp-based animal care products are natural, healthy and extremely comfortable. Perfect for a healthy and pleasant animal living environment with minimal environmental impact.

FACTS

- 1 hectare of agricultural land provides 9 tonnes of hemp straw per year (4x more biomass than a hectare of forest per year!)
- 1 hectare of hemp fibre stores 15 tonnes of CO₂ each harvest.
- Cultivation doesn't require pesticides and enriches the soil.

BENEFITS

HEMPFLAX animal care products are professionally and sustainably produced without any chemical additives. Virtually dust-free, therefore much less chance of allergic reactions and respiratory problems! And the natural antibacterial properties of the hemp plant prevent diseases and infections.

FOOTPRINT

HEMPFLAX truly cares for the environment. We believe in this plant and cultivate our own crops. In doing so, we are extremely resource economical. We aim to keep our carbon footprint as small as possible. Simply because we think it's important.

HEMPFLAX produces, on an industrial scale, raw materials, semi-finished and finished products based on environmentally conscious cultivated fibre hemp and flax. By cultivating its own crops, HEMPFLAX ensures a continuous supply of high-quality products. HEMPFLAX is ISO 9001 certified.
